## Mug Collection

design Gabriele Panciera — 2023

The Mug lamp collection draws inspiration from one of the most known trends of recent years: drinking hot take-away drinks. The design is characterized by a body in blown glass, which encloses the internal components of the lamp, and by an original hide covering. This detail can be customized for an essential or more colorful result. The body, made of white sandblasted glass, creates a welcoming atmosphere with a soft and diffused light. Young and versatile, Mug is available in three versions: table, floor and suspension.
