Sesamo Collection

Extendable elegance, customizable design

Sesamo collection design Paolo Vernier redefines the idea of extendable table, turning it into a true marvel. This enchantment reveals itself only when desired, leaving no trace of the hidden mechanism.

Available in four different models, Sesamo embodies minimalist elegance, making it a perfect fit for any contemporary space. The real magic of this collection lies in its invisible mechanism: a solution that makes extending the table effortless and smooth, as if it could "magically" adapt to any environment. Its functioning remains a mystery, hidden from view whether the table is open or closed.

Each Sesamo table is fully customizable: you can choose the base, the cover, and the tabletop to create unique and surprising combinations. It is a table that perfectly adapts to your project, transforming any space with a touch of refined practicality, as if by magic.
