## Calla P M\_T PP Armchair

design Fabrizio Batoni, 2019

Calla armchair with steel sled base. Polypropylene seat. The version with lacquered base in matt finish and polypropylene seat is suitable for outdoor use. Optional: cushion upholstered in leather, faux leather or fabric, for indoor use only.

When the plastic shell and cushion merge into a delicate synergy, the design becomes more precious and the comfort even greater.

### Colors and Materials

#### Structure

White steel

Sand steel

Pastel yellow steel

Grafite metal

Black steel

Light blue metal

Ocean blue steel

Bronze metal

Fango steel

Light grey steel

Brown steel

Ocher steel

Facepowder pink metal

Red steel

Sage green metal

Papaya orange steel

Ash grey metal

Golden yellow metal

Bulgaro red metal

Cherry red metal

Pine green steel

Dark green metal

#### Coating

## Polypropylene

### Materials Certifications

#### Dark green metal

The technologies used in the previous phase of powder coating play a fundamental role in the final result of the processing. They are in fact essential to increase adherence paint on the metal surface and then guarantee its duration over time. The metal frames, following a total cleaning of the surface, pass through chemical conversion processes, creating a compact base that allows for better adhesion of the subsequent treatment. In the last phase the object subjected to the powder coating process is placed in a polymerization oven, going to form an adherent and extremely tight layer durable. This particular paint job is ideal for outdoor use.

To clean the surface, use a damp microfiber cloth with neutral soap or specific metal cleaning products. Avoid hitting or rubbing the surface with sharp objects. Do not use scourers or other abrasive materials, since they would inevitably scratch the surface. Do not leave rusty iron objects on the surface for too long.

These surface treatments are not suitable for outdoor use, but they guarantee excellent resistance to frequent use, dirt and dust.

---

## Materials Certifications

### Polypropylene

Polypropylene is a resistant, non-toxic, odorless, heat resistant and easy to clean plastic material. It is also suitable for outdoor use. Our polypropylene is a material reinforced with glass fiber: an option with excellent mechanical properties that allows the product to be solid and resistant. This material has a marked resistance to fading: a treatment with UV stabilizer and AS antistatic protection works to prolong the beauty of the product by slowing the fading process. However, by exposing the chair to the sun and atmospheric agents for very long periods, the color can undergo alterations. As a thermoplastic material, it is 100% recyclable.

#### CLEANING AND MAINTENANCE

Polypropylene seats are easy to clean, and do not require the use of specific products, except in the case of stubborn and hard to remove stains. For simple and effective cleaning, use a microfiber cloth soaked in water or a solution of water and neutral soap. In case of stubborn stains, it is possible to act directly on them with a neutral detergent, always with the help of a microfiber cloth. Then rinse with water. Avoid abrasive sponges, stain removers and granular cleaners that could scratch the surface. If using a chlorine-based cleaner, rinse and do not dry in direct sunlight.

These tips are cleaning recommendations and do not guarantee complete stain removal.

We recommend that you always test the cleaning method on a hidden part of the item to check the resistance of the material.
