Galvanic treatments consist in applying a thin layer of a metal or other alloy, in order that properties of the surface are modified, both from a technical and an aesthetic point of view. Through this procedure it is possible to improve specific product features, such as endurance to corrosion.

CLEANING AND MAINTENANCE

To clean the surface, use a damp microfiber cloth with neutral soap or specific metal cleaning products. Avoid hitting or rubbing the surface with sharp objects.

GENERAL TIPS

Do not use scourers or other abrasive materials, since they would inevitably scratch the surface. Do not leave rusty iron objects on the surface for too long. These surface treatments are not recommended for outdoor, naval or seaside use.

FIRE RESISTANCE:
CLASSE 1IM
BS 5852 1-2

Hide is hygienic and practical, wear resistant and breathable. It is obtained from skin of cattle raised for food purposes, and subsequently treated with chromium salts. Any imperfections on the hide surface are

a natural feature that guarantee its originality.

CLEANING AND MAINTENANCE

Dust the surface regularly, with a dry and soft cloth. In case of stains, use only a non-abrasive damp cloth, and gently rub the area by moving the cloth in a circular direction starting from the edges of the stain towards the center. We recommend to act promptly: a delay could compromise the cleaning result. Do not use products that contain solvents or alcohol since they can damage the surface. Dry immediately after treatment. For a good conservation of the product, avoid direct sunlight, that can alter its characteristics and color, as well as exposure to heat sources.

We recommend that you always test the cleaning method on a hidden part of the item to check the resistance of the color. These tips are cleaning recommendations and do not guarantee complete stain removal.

Colour samples are to be considered approximate for each product. Slight color differences between a lot and the other are to be considered normal.

TYPE: NABUK TUSCAN HIDE

Nabuk Tuscan hide is obtained by working on the external part of the animal's skin, the fiore part. The surface is polished by using specific machinery, with the aim of obtaining a soft and velvety surface. Nabuk is a very fine hide, as only the best leathers are suitable for this type of processing, but at the same time it must be carefully maintained. Small imperfections on the surface guarantee its originality and naturalness, and are not to be considered manufacturing defects. This material is not water repellent and fears humidity. To maintain the beauty of the original color, avoid putting the Nabuk Tuscan hide into contact with water or any other liquid. Absorption of liquid can lead to an alteration of the finish.

TYPE: FIORE TUSCAN HIDE

Fiore Tuscan hide is a high-quality natural material, and softness is its main feature. Hide is not afraid to show the signs of time, that contribute to make it a unique product. Possible imperfections such as scratches, scars or stains on its surface are a natural feature that guarantee its originality and quality. This material is not water repellent and fears humidity. To maintain the beauty of the original color, avoid putting the Fiore Tuscan hide into contact with water or any other liquid. Absorption of liquid can lead to an alteration of the finish.

CLEANING AND MAINTENANCE

Hide is a fine and durable material, but still needs special attention. Do not directly expose it to light or heat sources, in order to preserve its characteristics. Avoid damaging the surface with sharp objects. To clean it, use a soft brush such as those commonly used for clothing. Alternatively, it can also be used a soft and dry cloth. Do not use specific liquid products or conditioners to clean the hide.

COMPOSITION: 100% leather

FIRE RESISTANCE:

CAL TB-117 (2013, Sec. 1)

BS 5852:1979

BS EN 1021-1-2:2006

Fiore leather is a natural product and this is why it can show signs such as wrinkles, veining and scars that indicate the animal origin of the product. These signs, together with slightly color differences, are distinctive elements that enhance its beauty and distinguish it from faux leather or other artificial products. Fiore

is a bovine leather from animals of European origin, finished with water-based dyeing with resins and pigments. Fiore leather has the ability of improving with time and use, both in softness and shine.

Dust the leather product regularly with a soft and dry cloth. In case of stains, rub the affected area with a soft and clean cloth, moistened with water or to use a light solution of water and mild soap, to be applied

gently with a wet cloth. Move the cloth in a circular direction, starting from edges of the stain towards the center. Rinse well with a damp cloth. Dry immediately after treatment. Avoid direct sunlight and exposure to heat sources.

We recommend that you always test the cleaning method on a hidden part of the item to check the resistance of the color.

These tips are cleaning recommendations and do not guarantee complete stain removal. In case of large stains, we recommend contacting an operator specialized in upholstered products cleaning.

Colour samples are to be considered approximate for each product. Slight color differences between a lot and the other are to be considered normal.
