Table bistro Plissé H73

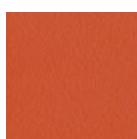

design Paola Navone, 2022

Table bistrot en métal, il peut être utilisé à l'intérieur et en extérieur, combinée avec des plateaux ronds.

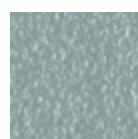

De la collaboration avec Paola Navone naît Plissé, une collection de tables à la présence sculpturale et élégante, mais aussi légère et informelle. De manière un peu ironique, Plissé rend hommage au monde de la mode et à l'icône travail plissé, tellement en vogue dans les années 50 et 60, et toujours à la mode aujourd'hui.

Couleurs et matériaux

Structure

Métal orange papaya

Métal bleu ciel

Metal blanc

Métal bleu ocean

Métal bronze

Metal corde

Métal fango

Métal jaune doré

Métal jaune pastel

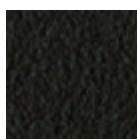

Métal graphite

Métal gris cendre

Métal gris claire

Métal marron

Certifications matériaux

Metal vert foncé

The technologies used in the previous phase of powder coating play a fundamental role in the final result of the processing. They are in fact essential to increase adherence paint on the metal surface and then guarantee its duration over time. The metal frames, following a total cleaning of the surface, pass through chemical conversion processes, creating a compact base that allows for better adhesion of the subsequent treatment. In the last phase the object subjected to the powder coating process is placed in a polymerization oven, going to form an adherent and extremely tight layer durable. This particular paint job is ideal for outdoor use.

To clean the surface, use a damp microfiber cloth with neutral soap or specific metal cleaning products. Avoid hitting or rubbing the surface with sharp objects. Do not use scourers or other abrasive materials, since they would inevitably scratch the surface. Do not leave rusty iron objects on the surface for too long.

These surface treatments are not suitable for outdoor use, but they guarantee excellent resistance to frequent use, dirt and dust.
