Fabrics

In our material folder it is possible to choose between a wide selection of fabrics and colors, different from each other in texture, composition and aesthetics. Cotton, linen, polyester, wool and other materials weave together to create timeless fabrics. Eco-friendly and stain-resistant options are available.

Maintenance

For regular cleaning vacuum frequently, at least once a week, at a power equal to half the device in use, choosing a smooth spout, without brushing. To clean stains, it is necessary to consider the best action depending on the material used. Refer to our complete material folder to apply the suggested treatment.

Upholstery

Faux leather

Faux leather of synthetic origin presents different compositions, depending on the variety chosen. The typical roughness of the leather is artfully impressed to imitate the characteristics of real leather, so that to the human eye it is almost indistinguishable from the real one. Light and resistant, it is easy to maintain and the effect in the furniture is extremely attractive.

Maintenance

For regular cleaning vacuum frequently, at least once a week, at a power equal to half the device in use, choosing a smooth spout, without brushing. To clean stains, it is necessary to consider the best action depending on the material used. Refer to our material folder to apply the suggested treatment.

I rivestimenti

Leather

The leather upholstery is timeless for its resistance to trends and its durability. The leather selected for our coatings comes from natural products, derived from European cattle. Due to the organic origin of the material, they may show signs such as wrinkles, veining or scars that make each piece unique and unrepeatable. Over time it is possible to appreciate even more this precious material which has the gift of improving with aging and wear.

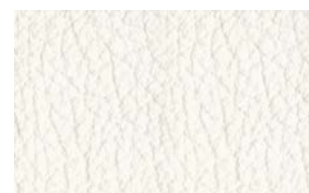

Manutenzione

For regular cleaning vacuum frequently, at least once a week, at a power equal to half the device in use, choosing a smooth spout, without brushing. To clean stains, it is necessary to consider the best action depending on the material used. Refer to our material folder to apply the suggested treatment.

Metal

The painting of the metal elements has a pleasant aesthetic function. In addition to this, it also performs an effective protective action against agents that can affect the beauty of the product. Our metal elements are powder coated, offer all the resistance necessary for an intensive product use, and allow you to communicate the personality of the object thanks to the wide choice of colors available.

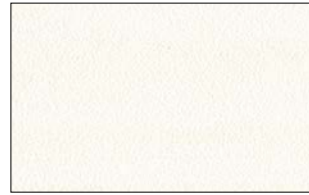

Maintenance

To clean surfaces, use a damp microfiber cloth with neutral detergent, or specific products for metal cleaning. Avoid using abrasive sponges or cleaners. Always test the cleaning method in a hidden part of the product to test color fastness.
